

Medicare Advantage

Medication Therapy Management Programs

We offer medication therapy management programs at no additional cost to members who have multiple medical conditions, who are taking many prescription drugs and who have high drug costs. These programs were developed for us by a team of pharmacists and doctors. We use these medication therapy management programs to help us provide better coverage for our members.

For example, these programs help us make sure that our members are using appropriate drugs to treat their medical conditions and help us identify possible medication errors. We may contact members who qualify for these programs. If we contact you, we hope you will join so that we can help you manage your medications. Remember, you don't need to pay anything extra to participate.

If you are selected to join a medication therapy management program we will send you information about the specific program, including information about how to access the program.

Your enrollment in this Plan doesn't affect Medicare coverage for drugs covered under Medicare Part A or Part B. Depending on the Medicare coverage criteria there may be some variation in the cost-sharing applied to the drugs. You may contact our Plan about different costs associated with drugs available in different settings and situations.

See your *Medicare & You* handbook for more information about drugs that are covered by Medicare Part A and Part B.
